EDUCATION

ANIL COMPUTING INSTITUTE

DCA (DIPLOMA IN COMPUTER APPLICATIONS)
Aug 2021 - Aug 2022

G.S.S.S HIGH SCHOOL

12TH GRADE
July 2022 | Per: 87%

S.S.S.S HIGH SCHOOL

10TH GRADE
May 2020 | Per: 74%

SKILLS

PROGRAMMING

Back-end Development:

- Node.js
- Golang
- PHP
- Express

Front-end Development:

- React
- JavaScript (including ES6 features)
- TypeScript
- HTML/CSS

Databases:

- MySQL • PostgreSQL
- MongoDB

Libraries and Tools:

- Redux • Bootstrap • VS Code
- Git • Linux

OTHER

- Problem-solving
- Data structures and algorithms
- Object-oriented programming
- API design and integration

EXPERIENCE

1.5 YEAR +

ARNOWA | Full Stack Developer

Sept 2022 - Present | Full-Time | Delhi, India

- Built and maintained robust web applications using **Node.js** and **MongoDB**, implementing server-side logic with **Express.js**
- Leveraged **React** and **TypeScript** to create interactive and responsive user interfaces, delivering enhanced user experiences.
- Developed and maintained high-performance **GoLang** and **PHP** applications to optimize data processing, API integrations, and middleware functionality.
- Implemented efficient code practices and performance optimizations to enhance the speed and responsiveness of web applications.

SMMGANG | Full Stack Developer

Jan 2022 - Aug 2022 | Part-Time | Amritsar, India

- Developed website using **PHP**, utilizing its server-side capabilities to handle user input, database interactions, and other back-end functionality.
- Utilized **Git** for version control and collaboration with team members, allowing for easy tracking of changes and rollbacks when necessary.
- Utilized PHP's integration with **MySQL** to efficiently store and retrieve data for the website, resulting in faster load times and improved user experience.
- Implemented security measures to protect against common web vulnerabilities in PHP such as SQL injection, cross-site scripting (XSS), and more, resulting in a more secure website.

PROJECTS

NOTEBLAZE MongoDB | Express | React | NodeJS | Mongoose

- Developed note management features including creation, editing, and deletion, with a strong focus on data security.
- Created a backend API with **Node.js**, **Express**, and **JWT** for user authentication and authorization.
- Developed a dynamic and responsive front-end with **React** that communicates with the backend using fetch and displays the data from **MongoDB Atlas** cloud database using **Mongoose**.

NEWSLINK React | Apis | Bootstrap

- Created a **React** web app that displays news articles from various sources using the News API
- Used **React Router** to implement navigation and routing between different pages and categories of news.
- Implemented pagination, search, and filter features to allow users to browse and access news articles of their interest.

SMMGANG PHP | MVC | JQuery | AJAX | MySQL

- Developed a social media management application using PHP with an MVC architecture.
- Implemented interactive features and real-time updates using jQuery and AJAX.
- Designed and optimized the MySQL database for efficient data storage and retrieval.
